Summary

Artificial Intelligence Specialist focused on developing and implementing AI solutions, including feasibility analysis, model optimization, and real-world deployment. Experienced in building and evaluating machine learning models for structured and unstructured data, with strong ability to translate business needs into AI-driven solutions.

Work Experience

- AI Engineer Intern (Artificial Intelligence Specialist) | Saudi Food and Drug Authority**

Mar 2026 – Present
Riyadh

 - Developed AI solutions for regulatory and business use cases
 - Defined AI requirements, technical specifications, and feasibility analysis
 - Designed and optimized machine learning models with continuous evaluation and improvement
 - Generated data-driven insights and automated processes to enhance operational efficiency
 - Collaborated with teams to align data and platform requirements for AI implementation
- Data Science Intern, Finance | Saudi National Bank (SNB)**

Jun 2024 – Jul 2024
Jeddah

 - Processed** and analyzed 1M+ banking records using SQL and Python for financial analysis
 - Built** 7 reports and 3 executive Power BI dashboards for data-driven decision making
 - Applied** predictive models to support financial forecasting and reporting workflows

Education

- University of Jeddah — Bachelor of Artificial Intelligence | GPA: 4.08 / 5**

Oct 2020 – Jan 2025
Jeddah

 - Studied machine learning, deep learning, natural language processing, and data science
- Saudi Digital Academy × Le Wagon — Data & AI Bootcamp**

Feb 2025 – May 2025
Riyadh

 - Intensive, **full-time 12 Weeks, Ranked Top 10** and led a capstone project showcased to the Minister of Communications
- Saudi Data & AI Authority (SDAIA) — Professional AI Bootcamp**

Dec 2025 – Feb 2026
Riyadh

 - Selected** participant in a professional program focused on Deep Learning

Projects

- RAG-Based Legal Document Q&A System (Labor Law)**
 - Built an end-to-end RAG pipeline using JinaAI embeddings, ChromaDB, and Gemini LLM for legal decision support
 - Applied semantic chunking, hybrid retrieval (keyword + vector), and re-ranking to improve answer accuracy
 - Exposed the system via REST API using FastAPI for real-time query handling
- VTAC – AI Assistant for Football Match Prediction**
 - Developed an ensemble **machine learning model** for match prediction achieving ~77% accuracy and log loss < 0.27
 - Built a **full-stack AI application** using Flask and React to deliver predictions and insights
- Multi-Modal Sentiment Analysis (Team Project)**
 - Implemented a Vision Transformer (ViT) for image-based sentiment classification achieving ~95% accuracy
 - Collaborated in developing a **multimodal deep learning system** for emotion recognition
- SAQR – AI-Based Metro Passenger Compliance System**
 - Built an **AI-based passenger compliance system** using face embeddings and similarity search
 - Detected food and drink violations using **computer vision models**
 - Implemented embedding-based video search to locate individuals within metro recordings

Skills

- Soft Skills**

Leadership & Team Collaboration, Communication & Stakeholder Engagement, Problem Solving & Critical Thinking, Decision Making & Adaptability, Initiative, Self-Learning & Strategic Mindset

Languages: Arabic (Native) , English (Fluent)
- Technical Skills**

Python, SQL, Machine Learning, Deep Learning, Generative AI, LLMs, NLP, LLM Fine-tuning (LoRA), Time Series Forecasting, Model Evaluation, PyTorch, Scikit-learn, LangChain, FastAPI (REST APIs), Docker, CI/CD, Git, Pandas, NumPy, Model Evaluation & Optimization AI Use Case Analysis & Feasibility

Awards

3rd Place – AI Agent Hackathon, organized under the **Ministry of Communications (MCIT)**, for developing an AI agent solution

Certifications and Training

- Professional Certifications**
 - CompTIA Data+
 - Junior Data Scientist — INE
 - Data Science & AI — Saudi Digital Academy × Le Wagon
- Professional Learning Programs**
 - Deep Learning Nanodegree
 - Generative AI** Nanodegree
 - Power BI Career Track DataCamp
