Summary

Technology & AI Consultant with hands-on experience in AI automation, LLMs, NLP, data analytics, and digital transformation. Skilled in analyzing business challenges, identifying technology gaps, and designing AI-driven solutions that improve operational efficiency and support data-driven decision-making.

Work Experience

AI Specialist , Emdad Solutions Contributing to AI projects delivered in collaboration with government organizations.	Aug 2026 – Present Riyadh
AI Engineer Saudi Food and Drug Authority - Developed AI solutions to support regulatory inspections and investigations. - Built NLP and OCR solutions for customer feedback analysis and secure document verification. - Analyzed business processes and large-scale datasets to improve operational efficiency and support data-driven decisions.	Mar 2026 – Aug 2026 Riyadh
Data Science Analyst Saudi National Bank (SNB) - Processed and analyzed 1M+ banking records using SQL and Python to support financial analysis and business decision-making. - Developed 7 analytical reports and 3 executive Power BI dashboards to support executive decision-making. - Applied predictive analytics to improve financial forecasting and reporting accuracy.	Jun 2024 – Jul 2024 Jeddah

Education

University of Jeddah — Bachelor of Artificial Intelligence GPA: 4.08	Oct 2020 – Jan 2025
Saudi Digital Academy × Le Wagon — Data & AI Bootcamp Top 10 Graduate Capstone Project presented to the Minister of Communications	Feb 2025 – May 2025
Saudi Data & AI Authority (SDAIA) — Professional AI Bootcamp	Dec 2025 – Feb 2026

Projects

RAG-Based Legal Document Q&A System (Labor Law) Designed and deployed a RAG system for intelligent legal search and question answering over Saudi Labor Law documents. - Integrated LLMs, semantic retrieval, and re-ranking to deliver accurate, context-aware legal responses.
VTAC – AI Assistant for Football Match Prediction - Developed an AI-powered football assistant combining match prediction, statistical insights, and conversational AI. - Built an ensemble model achieving ~77% prediction accuracy with voice interaction support.
Multi-Modal Sentiment Analysis (Team Project) - Developed deep learning models for emotion recognition from images and videos. - Trained and evaluated computer vision models for multimodal sentiment analysis.
SAQR – AI-Based Metro Passenger Compliance System - Developed an AI-powered metro compliance system using computer vision and embedding-based search. - Automated violation detection and intelligent video search to support faster operational response.

Skills

Soft Skills Leadership & Team Collaboration, Communication & Stakeholder Engagement, Problem Solving & Critical Thinking, Decision Making & Adaptability, Initiative, Self-Learning & Strategic Mindset Languages: Arabic (Native) , English (Fluent)	Technical Skills Python • SQL • Generative AI • LLMs • RAG • LoRA • NLP • AI Automation • Prompt Engineering • Machine Learning • Deep Learning • PyTorch • Scikit-learn • LangChain • FastAPI • REST APIs • Docker • Git • Pandas • NumPy • Power BI • OCR • Model Evaluation
---	--

Awards

3rd Place – AI Agent Hackathon, organized under the **Ministry of Communications (MCIT)**, for developing an AI agent solution

Certifications and Training

Professional Certifications - CompTIA Data+ - Junior Data Scientist — INE - Data Science & AI — Saudi Digital Academy × Le Wagon - NVIDIA Certified Associate – Generative AI and LLMs	Professional Learning Programs - Deep Learning Nanodegree Generative AI Nanodegree - Power BI Career Track DataCamp
